

CCSE (Checkpoint Certified Security Expert)

Contents

1. Lab Environment Setup

- Build the Management Server
- Build Gateways
- Install and configure NTP
- Upgrade to R70.1
- Establish SIC

2. Management Portal

- Configure Management Portal on corporate site
- Test Management Portal access
- Configure Management Portal access on partner site
- Test Management Portal

3. Smart Work flow

- Create New Administrators
- Configure Smart Work flow
- Open and Submit a Session for Approval
- Disapprove the Session and Request a Modification
- Approve the Session and Install the Policy
- Disable Smart Work flow

4. Smart Provisioning

- Enable Smart Provisioning
- Create New Profile
- Assign Profile to Gateways
- Verify Profile Changes

5. SSL VPN

- Configure Connectra R66 Gateway
- Enable Connectra Gateway in Smart Dash board
- Create a file-share application in the SSL VPN tab
- Create an Internal User
- Assign file-share access to User Group
- Update Rule Base for DMZ traffic
- Verify file-share access through the User Portal
- Configure embedded RDP
- Shutdown and remove Connectra Server

6.SecureXL

- Enable and Configure Secure XL on the Gateway
- Open connections and verify acceleration

7.Deploying New Mode HA

- Create and configure a secondary cluster member
- Configure Gateway-Cluster object
- Configure Cluster XL properties
- Modify the Rule Base
- Pass traffic through the cluster
- Observe cluster status in Smart View Monitor
- Perform test failovers

8.Load Sharing Modes

- Configure Load Sharing Uni cast mode
- Test Load Sharing Uni cast mode
- Configure Load Sharing Multicast mode
- Test Load Sharing Multicast mode

9.VPN with Sticky Decision Function

- Configure VPN in a Cluster
- View a packet capture of FTP connections without Sticky Decision function
- View a packet capture of FTP connections with Sticky Decision function

10.Configure Check Point QoS Policy

- Enable and Configure Check Point QoS
- Create Check Point QoS Rules and adjust Rule weights
- Verify and install Policy
- Test QoS Policy

11.Route-based VPNs with Static Routes

- Configure Gateway and VPN Community objects
- Add participating Gateway to Community
- Configure VTI's on participating Gateways
- Add Static Routes for internal networks

12.Eventia Analyzer

- Install the Eventia Suite on C G Corporate
- Configure the network object in Smart Dash board
- Configure Eventia
- Monitor events with Eventia
