

Checkpoint Certified Security Administrator

Contents

1. Introduction to Check Point Technology

- Check Point Security Management Architecture (SMART)
- The Check Point Firewall
- Security Gateway Inspection Architecture
- Deployment Considerations
- Check Point Smart Console Clients
- Security Management Server
- Securing Channels of Communication

2. Deployment Platforms & Introduction to the Security Policy

- Check Point Deployment Platforms
- Check Point Gaia
- Security Policy Basics
- Managing Objects
- Creating the Rule Base
- Rule Base Management
- Policy Management and Revision Control

3. Monitoring Traffic and Connections

- Smart View Tracker
- Smart View Monitor
- Monitoring Suspicious Activity Rules
- Smart View Tracker vs. Smart View Monitor

4. Network Address Translation

- Introduction to NAT
- Hid NAT
- Choosing the Hide Address in Hide NAT
- Static NAT
- Reply Packet
- NAT Global Properties
- Original Packet
- Object Configuration – Hid NAT
- Hid NAT Using Another Interface
- Static NAT

- Configuring Manual NAT

5.Using Smart Update

- Smart Update Architecture
- Smart Update Introduction
- Overview of Managing Licenses
- License Terminology
- Upgrading Licenses
- Retrieving License Data from Security Gateways
- Adding New Licenses to the License & Contract Repository
- Importing License Files
- Adding License Details Manually
- Attaching Licenses
- Detaching Licenses
- Deleting Licenses From License & Contract Repository
- Installation Process

6.User Management and Authentication

- Creating Users and Groups
- Security Gateway Authentication
- User Authentication
- Session Authentication
- Client Authentication
- LDAP User Management with User Directory
